Abstract (en)
[origin: WO2011051734A1] A child's toy (10) comprises a, preferably soft, head portion (12), a foldable body portion (14) attached to the head portion (12), and at least one fastener (62) for releasably retaining the body portion (14) in its folded condition. The head portion (12) includes at least one facial feature (20), and the body portion (14) when folded provides a muff (82) with opposing side openings for hands insertion in for example cold weather. When unfolded, the body portion (14) presents a pliantly flexible plastics changing mat element (44) on one major surface and a pliantly flexible play mat element (42) on the opposite major surface. The play mat element (42) includes at least one play element (40) for a child to interact with.
