Abstract (en)

[origin: WO2011054528A1] The invention relates to a fine dust extraction unit (1) for an output device (2) operating according to an ink particle printing method, such as a printer, copier or fax machine. The fine dust extraction unit (1) comprises an exhaust hood (11), which can be disposed above the output device (2) and is designed with a fine dust filter (11f) in order to extract the ink particles and optionally also other fine dust.
