Abstract (en)
[origin: GB2475092A] A blank form 1 for a one-piece mailing document, comprises a paper substrate 2 having a peripheral border area 3 adjacent its edges; a pattern of adhesive located in the border area; and wherein a barrier layer 4 is interposed between the paper substrate and the adhesive pattern, to enable peeling apart without damaging the sheet. An optional line of perforations is laid down just inside the border area 3. The varnish used may be printer's UV varnish and this is dried by exposure to UV light before the adhesive is applied. The adhesive may be a contact adhesive activated when two pieces are brought together.
