Abstract (en)
[origin: WO2011054521A2] An improved revolving door is characterized by the following features: the at least three door leaves (15) can be moved along a movement path (25) between the outer and the inner position, and vice versa; a lateral offset (23) of the movement path (25) or of the extension thereof runs through the axis of rotation (7); in the retracted position, the respective door leaves (15) adjoin and preferably extend parallel or concentric to the associated column wall (21, 121) or the associated column wall section (21, 121).
