Abstract (en)

[origin: WO2011054495A1] The invention relates to a device in an electronic display element (1) for displaying safety regulations (2), the regulation to be displayed being at least partially formed by an animation. To this end, a control unit (4) for calculating the content of the safety regulation (2) to be displayed and a graphical unit (5) are provided, said graphical unit putting together the content of the safety regulation (2) calculated by the control unit (4) based on stored image elements (6a-6d) which are partially formed by image sequences for the animation.
