Abstract (en)

[origin: WO2011054073A1] A portable electronic device-implemented method includes loading a first web page, rendering the first web page on a display of the portable electronic device, storing the first web page in memory at the portable electronic device, and rendering a first selectable representation of the first web page in a field on the display. The field includes at least one other selectable representation of another web page stored in memory.
