Abstract (en)
The present invention relates to a process for decorating a glazed ceramic tile, comprising the steps of: (a) applying a primer composition on the tile and optionally wiping off the excess primer composition from the tile; (b) applying an ink composition comprising a radiation curable component on the primer composition by inkjet technology and (c) curing the ink composition. The process may further comprise the step of (d) optionally providing a protective coating on top of the cured ink composition.
