Abstract (en)  
[origin: EP2497737A1] Provided is a call registration device of an elevator which can easily change recognition information for determining a destination floor without using external equipment. For this purpose, this call registration device includes a microphone provided in an elevator hall or a car, a storage device which has stored recognition information on the floor of a building in which the elevator is installed as information to be compared with a voice inputted from the microphone in registering a car call on the basis of the voice inputted to the microphone and change means for changing the recognition information stored in the storage device on the basis of a voice inputted to the microphone within a given period of time after a special operation set beforehand is performed by use of elevator equipment of a hall or car where the microphone is provided.
