Abstract (en)
[origin: EP2497744A2] The tool (5) has a gripping unit applying holding force to a closure (2) and provided with a permanent magnetic actuator that is utilized for applying the holding force. The gripping unit includes a set of gripping members linearly moved relative to each other, where the gripping members are pivoted around an axis in gripping- and release positions. The permanent magnetic actuator includes a linear or radial combination of magnets, where the holding force is applied or released by displacement of the magnets relative to one another.
