Abstract (en)  
[origin: EP2498011A2] The disclosure relates to a radiator bracket (1) for suspending a radiator (8) on a wall. The radiator bracket (1) comprises a rail (2) with a first and second engagement means (6, 7) for cooperation with respective portions of the radiator (8) or fixing devices (9, 10) disposed thereon. At least the first engagement means (6) has a locking device (3). The locking device (3) has a stand-by position and a locking position, where the locking device (3) is pretensioned towards the locking position by spring means (4). The locking device (3) is rotatably and displaceably connected to the rail (2) so that the locking device (3) is moveable in one plane between the stand-by position and the locking position.
