Abstract (en)
[origin: EP2498041A2] The safety device has a safety element (10), which is inserted into the sleeve of the bolt assembly after removing the lock bay and is fixed in the sleeve in a stable manner by suitable unit. Another safety element (30) is provided beside the former safety element, where the latter safety element is inserted into the sleeve of the bolt assembly and interacts with the former safety element. A fixing element fixes the latter safety element in a stable manner in a position.
