Abstract (en)

[origin: EP2498228A1] The device has coin store that is closable by a first closure element input port (5) for inserting coins in coin store, on receiving coins (9) in coin store. The coin store is closable by second closure element discharge port for removal of coins from coin store. The coin store has provisioning storage chamber (2) for coins, from which coins are removed via outlet opening (7). A lock unit (8) is provided between storage tank chamber (1) and storage chamber. The chambers are separated from each other in closed position, or otherwise chambers are connected via a passage opening (12).
