Abstract (en)

[origin: EP2498241A2] The emergency lighting unit (41) has a light-transmissive cover (43) by which light is delivered to outside from a light source that is arranged in an emergency lighting unit. The lighting unit housing (44) has a thinner material cross-section as compared to the housing in a region (45) in which the light of the lighting unit (42) is emitted such that the light emitted from outside of the lighting unit housing is visible from the lighting unit.
