Abstract (en)

[origin: WO2011060150A2] A patient garment 10. The garment 10 is configured to highlight the intercostal area of a patient during an echocardiographic examination. The garment 10 comprises a front panel 36 having a front top edge, a front bottom edge, a front left side and a front right side. The front panel 36 has an access opening 42 defined there through. The garment 10 further comprise a back panel 38 having a back top edge that is connected to the front top edge, a back bottom edge, a back left side and a back right side. The access opening 42 is positioned on the front panel to expose an area of the patient's torso between a 3rd intercostal area and a 5th intercostal area of the patient's torso.
