Abstract (en)
[origin: WO2011059389A1] Bench arrangement for a cupboard (2) in a frame (1) having a front edge and a rear edge essentially parallel to the same, as well as a front bracket (1.3) along the front edge and a rear bracket (1.5) along the rear edge. At least one cupboard (2) is arranged underneath the frame (1) and movable along the brackets (1.3, 1.5) and fixable in different positions along the brackets (1.3, 1.5). The respective bracket (1.3, 1.5) has horizontal support members (1.8, 1.9) and the cupboard (2) has suspension members (5.1), which in an in-use position rest against the respective support members (1.8, 1.9) of the respective bracket (1.3, 1.5). Preferably, the respective suspension member (5.1) is a ruler, which extends perpendicular to the longitudinal direction of the brackets (1.3, 1.5). The bench arrangement may comprise a guide frame (5) having two rulers (5.1) and one or more guides (5.2) are advantageously arranged underneath the bench top (1.1) and extend between the brackets (1.3, 1.5). The cupboard (2) is detachable from the guide frame (5) and displaceable on the guides (5.2) and fixable in a position where it entirely or partly is located inserted under the bench top (1.1).
