Abstract (en)

[origin: CA2780447A1] The invention relates to a column (1) having supporting devices for internal column fittings, the supporting devices having load-introducing elements fixed to the column inner wall, e.g. formed as peripheral supporting rings (3) or supporting brackets, and crossbeams (4), which are supported from below by the load-introducing elements, for supporting the internal column fittings. In order to minimize the size of the crossbeams (4), vertical supporting beams (5) which support the crossbeams (4) are provided within the column (1).
