Abstract (en)
[origin: WO2011058414A1] A packet (1) for smoking articles comprises an external casing, including a containing body (3) and a closing body (4) rotatable around a hinge (5). In order to increase a surface of the packet (1) available for communications to the consumer, advertising messages and suchlike, the packet (1) comprises an internal casing (18) slidable with respect to the external casing, the closing body (4) being joined to the internal casing (18) so as to be distanced from the containing body (3) when the internal casing (18) is at least partly extracted from the external casing (2) and the hinge (5) being made on an external wall (22a, 22b) of the internal casing (18).
