Abstract (en)
[origin: WO2011054415A1] The invention relates to a method for operating a winding device (100) of a processing machine for processing a material web (102), wherein a winding device is provided for winding or unwinding the material web (102), wherein the winding device (100) is operated to specify a web tension, wherein a switch occurs from a first web tension specification procedure to a second web tension specification procedure during the processing of the material web.
