Abstract (en)

[origin: WO2011057614A1] The present invention relates to a method for coating a plastic surface and to a correspondingly coated plastic component, wherein at least one partial layer (3) of the coating is applied by means of kinetic cold gas spraying, wherein a base layer (2) is applied by means of another method different from kinetic cold gas spraying between the plastic surface (1) and the cold gas sprayed partial layer (3), wherein the base layer is selected in such a way that adhesion of the base layer on the plastic surface is ensured and that it is possible to deposit the partial layer by way of by cold gas spraying.
