Abstract (en)

[origin: WO2011057619A2] The invention relates to a method for producing a motor vehicle door latch and such a motor vehicle door latch. Electrical/electronic components (7, 8) are provided in and/or on a housing (6). Individual or all electrical conductive tracks for contacting the components (7, 8) are integrated in a plastic substrate (6a). According to the invention, the electrical conductive tracks are applied to the plastic substrate (6a), which is produced or is to be produced independently of the electrical conductive tracks.
