Abstract (en)
[origin: WO2011104102A1] The base carrier (2) is intended for an illumination device (L1; L2; L3) and has a printed circuit board (4) having at least one first plug connection element (9) for mechanically holding and electrically connecting a light source carrier (3) to the printed circuit board (4). The light source carrier (3) has at least one printed circuit board (11) having at least one light source (6) fitted thereto, in particular a light-emitting diode, and a plug connection mating element which is fitted thereto and is intended to establish a plug connection to a first plug connection element (9) of the base carrier (2).
