Abstract (en)

[origin: WO2011057953A2] The invention relates to a refrigerator, in particular a household refrigerator, comprising a door (1) having a door interior comprising a catch (6) acting together with a corresponding mating catch (18) of at least one catch device (16, 17) for holding a door rack (4) between two opposing rails on the door (1), said device being fastened as a separate component on a mating plug means (30) of the door rack (4) by means of a plug means (26, 27). The plug means (26, 27) is visibly connected to the mating plug means (30) in a position of the door rack (4) held between the rails of the door (1).
