Abstract (en)
[origin: WO2011057771A1] The invention relates to a contact device comprising a first plug device (1) and a second receiving device (2), wherein the plug device (1) and the receiving device (2) can be connected to each other to produce an electric contact, wherein the plug device (1) and the receiving device (2) comprise a central bore (3, 4) that is respectively provided to receive an optical conductor (5, 6). When connecting the plug device (1) and the receiving device (2), the optical conductors can be coupled to each other.
