Abstract (en)

[origin: WO2011060335A1] A system and method for providing a conduit to send information to emergency services from a wireless device. Systems and methods for registering an alarm button on a wireless device and sending to public and/or private emergency services providers information related to the wireless device including its location, information about a wireless device end user and/or subscriber associated with the wireless device, and information recorded by one or more wireless devices during and subsequent to the time the alarm button is activated.
