Abstract (en)
[origin: EP2500291A1] The container has a hinge bolt or hinge pin (19) for pivot engagement in a receiving gap (15) of base frame (2). The receiving gap has an elongate opening having a length sized to correspond to thickness of sidewall (4) so that the sidewall is liftable in vertical direction. Two guide elements (11) are received in recesses (5) in base frame. The recesses have a nose (6) defined by upper edge (7) spaced from upper edge (8) of base frame by a distance which corresponds to the length of guide element from lower edge (12) of sidewall to lower edge (13) of guide element.
