Abstract (en)

A wire rope (1) includes a rope body (1A) including a plurality of strands (2) that are twisted, each strand (2) including a plurality of wires (3). A gap between the strands (2) of the rope body (1A) is filled with a different material differing from a material of the wires (3). The different material is exposed from the gap between the strands (2) at a surface of the rope body (1A), so that a different-material spiral portion (10A, 10B) that is spirally formed around an axial line of the rope body (1A) is formed at the surface of the rope body (1A).
