Abstract (en)  
[origin: EP2500470A2] The carriage (1) has a floor conveyor belt (3), a transfer conveyor belt (4) and a loading conveyor belt (5) provided on a side of the carriage. The floor conveyor belt and the transfer conveyor belt are provided on another side of the carriage. The belts are selectively positioned and adjusted with respect to a conveying direction such that alternatively or simultaneously a working train with a maintenance carriage (2) is loaded with construction material via the head carriage. New material is unloaded from the maintenance carriage in the train via the head carriage. The construction material is excavated sand and gravel.
