Abstract (en)
[origin: EP2500507A2] The holder has a U-shaped open holding brace (1), and closing brackets (2, 3) articulated to the holding brace. The closing brackets together with the holding brace have a closed frame for receiving a head rail (4) in closed position. The head rail is inserted from an open side of the U-shaped holding brace into the U-shaped holding brace in open position. The closing brackets have a link arm and a closure arm connected by a joint. The link arm is hinged to free end of the holding brace. The closure arm is mounted at opposite free end of the brace in the closed position.
