Abstract (en)

[origin: EP2500873A2] The system has a mobile radio transmitter (3) provided with an activation key (4) and a primary actuating element (5). The boot lid (2) is arranged on outer side of vehicle (1). The primary actuating element is provided to operate a secondary actuating element (6) for locking and unlocking boot lid. The boot lid is opened in unlocking state of secondary actuating element operated by primary actuating element while other doors and hatches are locked. The secondary actuating element is locked again after subsequent opening and closing of the boot lid, in predetermined time delay.
