Abstract (en)
[origin: WO2011061521A1] A webbed shoulder pad (1) is for use with a shoulder carrying strap (7). The pad (1) has opposing ends (2, 3) which, in use, attach to a shoulder strap (7), and a plurality of tendon bands (4) having opposing ends, and at least two nodes (5). Each tendon (band 4) extends between a pair of nodes (5), and each tendon band (4) is spaced apart and disconnected from other said tendon bands (4) between said nodes (5). The tendon bands (4) thereby form a web arrangement which extends between the opposing ends (2, 3) of said pad (1).
