Abstract (en)

[origin: WO2011061864A1] The purpose of the present invention is to provide a cosmetic or dermatological composition wherein a sticky feeling on use, which may be caused due to a lipophilic active ingredient contained in the composition, is reduced and a good feeling on touch of the composition is obtained. This purpose was accomplished by using a) at least 5% by weight of one or more of lipophilic cosmetic or dermatological active ingredients relative to the total amount of the composition; b) a non-alcoholic volatile solvent which is different from a cyclomethicone; c) a volatile alcohol; d) wax particles; and e) a non-volatile compound having at least one hydrophilic functional group.
