Abstract (en)  
[origin: WO2011060927A1] The invention relates to a water amusement ride (1), comprising at least one water vehicle (20) that can be moved in a body of water and a floating body (23) that is carried by water, having seats for accommodating passengers, wherein a platform (10) is provided, which extends out of the water surface (4) of the body of water when the water amusement ride (1) is in an idle state and is beneath the water surface (4) when in operation. An advantage of said invention is that the passengers can reach their seats in the water vehicles without getting wet feet when the water amusement ride is in an idle state.
