Abstract (en)
[origin: WO2011058489A1] The invention relates to a novel insert (1) for a transport container made of plastic material, comprising a grid-shaped compartmentation (11) for glasses and the like that consists of plastic strips (12), wherein at least two substantially identical insert parts (2, 3) are provided, which are joined to each other at a distance by means of at least two height-adjustable support elements (17). Different inserts (1) can be stacked underneath one other.
