Abstract (en)

[origin: WO2011061467A1] Shower apparatus (10) comprises a shower base (18), and at least one load sensing element (36) for monitoring at least a water load on the shower base (18) and for outputting a load signal to a controller (34) for automatically controlling the apparatus (10) based at least in part on the outputted load signal. A method of automatically controlling shower apparatus (10) based at least in part on a water load imparted is also provided.
