Abstract (en)

[origin: WO2011059399A1] The invention concerns a method for manufacture of construction elements (1) of artificial snow (2) comprising the introduction of artificial snow (2) under pressure into a compartment (3), where the compartment (3) has a form that corresponds to the desired or determined form of the construction element (1). The invention concerns also an arrangement (4) that is to be used during manufacture of construction elements (1) of artificial snow (2). The arrangement (4) comprises a compartment (3) into which artificial snow (2) is introduced under pressure, that the form of the compartment corresponds to the desired or determined form of the construction element (1), and that the arrangement (4) is manufactured from a rigid material.
