Abstract (en)

[origin: WO2011061428A1] The present invention relates to a structural element (6) of a vehicle (1), said structural element having an attachment opening (16) for enabling the passage and attachment of an attachment member (10) of a locking sub-assembly (5) for a door leaf (2). Said structural element is characterized in that each attachment opening (16) has an insertion area (17) that is designed for the passage of the attachment member (10) therethrough and is extended by a guide groove (18) that extends in a predetermined direction.
