Abstract (en)
[origin: WO2011098358A1] The invention relates to a lamp (1) having at least one solid light source (2) which is installed on a carrier (3), an at least partially light-permeable vessel (4) which encloses the light source and the carrier in a gas-tight manner and a filling gas mixture (5) which is enclosed in the vessel. According to the invention, the filling gas mixture is a mixture of at least one gas having a high thermal conductivity and at least one gas having a different physical property.
