Abstract (en)
[origin: WO2011060754A2] The invention relates to a device for fastening at least one solar module (19), particularly a photovoltaic module, comprising at least one module carrier (4) on which at least one holding part (18) for the non-positive and/or positive fastening of the solar module (19) is arranged. The holding part (18) is designed for supporting at least one solar module (19).
