Abstract (en)

[origin: WO2011061064A2] The invention relates to a refrigeration appliance, especially a domestic refrigeration appliance (1), which comprises a carcass (2) having an interior (3) that can be refrigerated, a door leaf (4) provided for opening and closing the interior (3) and supported by the carcass (2) and a storage compartment arranged in the interior (3) which storage compartment can be hermetically closed and evacuated. The storage compartment is designed as a drawer (6), wherein a control device (8) for evacuating and/or aerating the drawer (6) can be actuated by way of a pressure acting upon the drawer (6).
