Abstract (en)  
[origin: WO2011058157A1] The invention relates to a timepiece movement comprising an energy source (12), a time base provided with a plurality of balances (16) pivoting about the respective axis of rotation thereof, means (14) for connecting the energy source (12) to the time base, and mobiles arranged to carry time display means (18). According to the invention, said balances (16) are oriented such that planes perpendicular to axes of rotation thereof define a regular polyhedron.
