Abstract (en)
A hanger (201) for a package, the hanger comprising an actuator (202,222), a deformable engagement member (203,223) and a body (261), the deformable engagement member configured to be repeatably deformable by user actuation of the actuator to allow for engagement and/or disengagement of the engagement member with ends of a package slit to allow for respective carrying and release of the package by/from the hanger, and wherein the deformable engagement member is at an opposing end to a hook (210) end of the hanger, the body comprising a fold line (262) configured to allow the body to be folded back on itself to position the engagement member back towards the hook end.
