Abstract (en)

The blanket comprises a printing layer (1) made of polyurethane, where the printing layer is detachably connected with a rigid layer (2) made of polyethylene terephthalate, a compressible layer (3) that is detachably connected with the layer of the blanket and is made of polyurethane, polyethylene, polypropylene, polyvinyl chloride, nitrile rubber, butyl rubber, styrene-butadiene rubber, ethylene-propylene-diene rubber, polystyrene, silicon and/or its mixtures, flexible and fabric layers that are detachably connected with other layer of the blanket, and a pressure-sensitive adhesive layer. The blanket comprises a printing layer (1) made of polyurethane, where the printing layer is detachably connected with a rigid layer (2) made of polyethylene terephthalate, a compressible layer (3) that is detachably connected with the layer of the blanket and is made of polyurethane, polyethylene, polypropylene, polyvinyl chloride, nitrile rubber, butyl rubber, styrene-butadiene rubber, ethylene-propylene-diene rubber, polystyrene, silicon and/or its mixtures, flexible and fabric layers that are detachably connected with other layer of the blanket, and a pressure-sensitive adhesive layer. The blanket further comprises first and second layers selected from the flexible layer, compressible layer, or fabric layer. The layers are detachably connected by a pressure-sensitive adhesive or common assemblage on a common pressure cylinder, where two layers are fixed one above the other by the common assemblage.

Abstract (de)

Drucktuch umfassend mindestens eine druckende Schicht aus Polyurethan, die trennbar mit mindestens einer steifen Schicht aus Polyethylenterephthalat verbunden ist, wobei das Drucktuch mindestens eine kompressible Schicht aufweist, die trennbar mit mindestens einer Schicht des Drucktuchs verbunden ist.
