Abstract (en)

[origin: EP2502855A1] The device (1) has a container (2) for containing dry concrete, and unloading units (3) for unloading the container. A receiving structure (4) is placed on a ground, and internally receives the container and a part of the unloading units. A hinge type mounting unit (5) mounts the unloading units movably with respect to the receiving structure between a retracted position inside the receiving structure and a deployed position partly outside the structure. The unloading units are provided with a mixing unit (31) installed at an outlet of a conveying unit (30) for mixing the concrete with water.
