Abstract (en)

[origin: EP2502866A1] The hose cart (1) has double decoiler, a hose connector (57) and two drums arranged parallel to each other. Three U-shaped brackets made of tubular material sections are clamped transverse to the drive direction. Cylinder shaped, stationary drum wheels (511) form the double sided closure of a hose winding device (5) that has hose reels (51,53) twistable independent from each other. The hose reels are supported by a stationary central console (55).
