Abstract (en)

[origin: EP2503049A1] The draining device has a drawer (4) arranged in an insertion compartment. Chambers for storing liquid or powder detergents. The chambers are arranged in the drawer such that removal of the powder is carried out by openings (6,7) at rearward of front walls of the chambers. An outlet channel (9) is formed as a separate component, which is arranged below the drawer and is separated for cleaning of the drawer.
