Abstract (en)
[origin: EP2503246A2] The combustion chamber head comprises an annular outer combustion chamber wall (104) and an annular inner combustion chamber wall (107) with multiple burners (106) arranged around the periphery in a distributed manner. Multiple segment like head elements are arranged around the periphery, whose number is equal to the number of burners and which extend in radial direction between the inner combustion chamber wall and the outer combustion chamber wall and in peripheral direction between radial planes formed between the burner central axes.
