Abstract (en)

[origin: WO2011062648A2] A deodorizing member is provided that has a base sheet that carries an adhesive layer. The adhesive layer has a tackiness sufficient to adhere undesired objects from an item thereon when placed into contact with the undesired objects. A plurality of deodorizing particles are carried by the adhesive layer, and at least one has a portion thereof that is not covered by an upper surface of the adhesive layer. The deodorizing particles deodorize the item. An associated method of manufacture is also provided.
