Abstract (en)
[origin: CA2780340A1] The invention relates to a clamping device, comprising a clamp head piece (1), in which a linearly movable actuator (2) having two position transmitters (3, 4) that can be adjusted relative to each other is arranged, the position transmitters being designed to interact with two sensors (5, 6) arranged at a fixed distance from each other and so as to be fixed to the clamp head piece (1). According to the invention, one separate insertion opening (7, 8) accessible from outside is provided on the clamp head piece (1) for each sensor (5, 6).
