Abstract (en)
[origin: US2011123685A1] A packaged food product has (i) a tray, (ii) a plurality of stackable chip snacks aligned on the tray main body, and (iii) a tubular container. The tray contains (1) a tray main body comprising a proximal tray end and a distal tray end, and (2) a cushioning space at the distal tray end. The tubular container contains a wall body, a closed container end adjacent to the wall body, an openable container end adjacent to the wall body and opposed to the closed container end, the tubular container comprising the plurality of stackable chip snacks and the tray therein. The tray is aligned so that the cushioning space is oriented adjacent to the closed container end.
