Abstract (en)  
[origin: WO2011063807A2] The invention relates to a packaging, which performs a passive flight motion, in particular a gliding and/or autorotation motion, during free fall. The invention is characterized in that the packaging has at least one wing (2), in particular at least one gliding wing and/or one rotor blade (2), and at least one accommodating space (1) for an object (3) to be packaged.
